

**Clinically Demonstrated Efficacy in Maintaining
Normal Blood Pressure**

**Japanese Established Ingredient for Heart Health /
Healthy Aging (~20 years)**

**Without Any Known
Side-effect**

High Bioavailability

Sustainably Sourced

**Maintaining Normal
Blood Pressure**

VALTYRON®

Sardine peptide from Japan

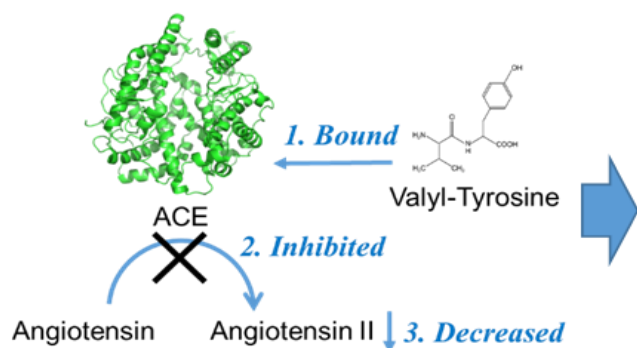

Maintaining normal blood pressure is important for maintaining healthy organs such as heart, brain, kidney, eye, etc.

VALTYRON® is a clinically studied peptide extract or a nature-based functional food ingredient made from the hydrolyzed protein found in sardine muscle.

Clinical studies support **the effectiveness of VALTYRON® to maintain the normal blood pressure** thanks to its known active component, Valyl-Tyrosine.

Proposed Mechanism

**Maintaining Normal
Blood Pressure**

Research shows that daily supplementation of VALTYRON® for > four weeks promotes maintaining normal blood pressure.

The suggested daily dose of VALTYRON® is 0.5-0.6 g.
